Architectural and Outdoor Photography

The Built Environment

Architectural photography is so much more than simply capturing the standard "product" shots. While these documentary shots are necessary, in most shoots, in order to capture the overall essence of the project for the various marketing and sales purposes, the true Architectural Photographer will then go beyond the ordinary, using their own creative vision to capture a completely different perspective of the project.

As a practicing Architect, Robert Jordan understands the soul of a building and uses this perspective to see, and capture, a creative viewpoint that may not be obvious to others. As an active Outdoor Photographer as well, his unique vision of light, angles, shapes and forms, from the natural world, colors his creative vision in Architectural Photography.

Spectre Imaging can be commissioned for virtually any type of architectural shoot, for Architects, Contractors, Real Estate Professionals, Developers, Corporate Clients, and Private Clients. We shoot all project types, both interior and exterior, and can capture simple sales and marketing shots, editorial shots for magazines and other publications, and abstract/fine art shots.

Please do not hesitate to contact us regarding your project. We would be pleased to meet with you to discuss your needs and to provide a quotation for services and licensing.

Outdoor

We have a tremendous love for the outdoors that starts in our home state of Michigan. The majestic Great Lakes, extensive woodlands, vast range of flora and fauna, big cities, charming towns, and incalculable recreation opportunities, make our home a paradise for Outdoor Photographers, and offer nearly infinite subjects for our lenses.

We also love to travel, particularly to the tropical regions, and have spent many exciting times shooting throughout the World.

Fine Art and Product

Capturing truly distinctive fine art and product images requires an innate sense of shape, form, pattern, and color, in addition to solid technical skill. Having developed our eye for these things through architectural design and photography, it is a natural progression for Spectre Imaging to work in the fine art and product studios.

Private installations, Corporate installations, product shots, stock images, commissioned projects, and both interior and exterior shoots are all part of our portfolio.

An Architect by profession, Robert Jordan has always had an interest in the graphic arts, including photography. His love of the built environment, travel, the outdoors, and fine art, all lend themselves to his passion for capturing his view of the world. Robert is still a practicing Architect, but regularly takes photographic commissions and also spends many hours building his stock library with built environment, outdoor, and fine art images.

Robert utilizes the following equipment: Mamiya RZ67 Pro II medium format camera, with a Leaf Aptus 65, 22 megapixel digital back; Mamiya 645AFDIII medium format camera with a Leaf Aptus II-6 28MP back; and when out and about, a Sony DSC-RX100 compact camera. All of these cameras produce outstanding images.

All images are available in a myriad of forms, from various resolutions of digital downloads to 30"x40" mounted prints, and many things in between. Should you need a specific item or image that you do not see displayed on our website, please do not hesitate to contact us to discuss. If you would like to discuss retaining us for a shoot, or to obtain commercial usage rights for any image, please contact us for a quote.

We appreciate the time that you are taking to view our work and hope that you take as much pleasure in viewing our images as we did in creating them.

Thank You,

Robert Jordan
